DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on May 3, 2005 has been entered. It is noted to the applicant that although the IDS has been entered as the submission, no other papers were found attached to the RCE. The claims were finally rejected, however, the applicant did not respond to any of the previous rejections. The previous rejection has been maintained.

Claim Objections

Claim 5 is objected to because of the following informalities: a spelling error exists in line 10. Appropriate correction is required. It is suggested to change "arc" to recite --are--.

Claim 12 is objected to because of the following informalities: It is unclear to the examiner how the concave arcs having curvatures that correspond with the curvatures of the convex arcs (as claimed in 12) when the concave arcs have already been claimed to have larger radii than the convex arcs (as claimed in claim 1), resulting in a possible alteration of the claim. Appropriate correction or clarification is required.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Art Unit: 3738

F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over **claims 1-5 and 15-19 of copending Application No. 10/382,702, and claims 1 and 3-9 of copending Application No. 10/776,434, and claims 1-17 of copending Application No. 10/776,650, and claims 1, 3, 5-13, 15, and 16 of copending Application No. 10/776,471, and claims 1-18 of copending Application No. 10/776,656.** Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are either merely broader than the co-pending application claims, or simply use different terminology to describe the features of the invention, for instance saddle and toroidal both describing a surface with concave and convex arcs, and also, different radii and non-congruent both describing a similar surface. The current application claims 1-20 are merely broader or obvious equivalents of the co-pending application claims. Once applicant has received a patent for a species or a more specific embodiment, and is not entitled to a patent for the generic or broader invention. The more specific "anticipates" the broader. The patented claim "anticipates" the application claim. *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

Claims 1-20 would be allowable in the case that the provisional double patenting rejection was overcome, along with the above claim objections.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
